

ALTAGAS LTD. DELIVERS COD CERTIFICATE FOR ITS 16 MW VOLCANO CREEK HYDROELECTRIC FACILITY

Calgary, Alberta (December 22, 2014)

AltaGas Ltd. (“AltaGas”) (TSX:ALA) today announced that the 16 megawatt (MW) Volcano Creek run-of-river hydroelectric facility has successfully completed the 72 hour period of testing required to achieve the commercial operation date (COD) pursuant to the 60-year, fully indexed Electricity Purchase Agreement (EPA) with BC Hydro. A certificate of COD has been delivered to BC Hydro.

“This is the last milestone for completing Volcano Creek two years ahead of schedule,” said David Harris, Chief Operating Officer of AltaGas. “The final test phase went as planned and Volcano Creek has officially started delivering clean power to British Columbia.”

The Volcano Creek facility is located in northwest British Columbia. The facility captures energy produced by the natural flow and elevation drop of the creek to produce and deliver clean, renewable power to BC Hydro.

AltaGas is an energy infrastructure business with a focus on natural gas, power and regulated utilities. AltaGas creates value by acquiring, growing and optimizing its energy infrastructure, including a focus on clean energy sources. For more information visit: www.altagas.ca

This news release contains forward-looking statements. When used in this news release, the words “may”, “would”, “could”, “will”, “intend”, “plan”, “anticipate”, “believe”, “seek”, “propose”, “estimate”, “expect”, and similar expressions, as they relate to AltaGas or an affiliate of AltaGas, are intended to identify forward-looking statements. In particular, this news release contains forward-looking statements with respect to, among other things, business objectives, expected growth, results of operations, performance, business projects and opportunities and financial results. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. Such statements reflect AltaGas’ current views with respect to future events based on certain material factors and assumptions and are subject to certain risks and uncertainties, including without limitation, changes in market, competition, governmental or regulatory developments, general economic conditions and other factors set out in AltaGas’ public disclosure documents. Many factors could cause AltaGas’ actual results, performance or achievements to vary from those described in this news release, including without limitation those listed above. These factors should not be construed as exhaustive. Should one or more of these risks or uncertainties materialize, or should assumptions underlying forward-looking statements prove incorrect, actual results may vary materially from those described in this news release as intended, planned, anticipated, believed, sought, proposed, estimated or expected, and such forward-looking statements included in, or incorporated by reference in this news release, should not be unduly relied upon. Such statements speak only as of the date of this news release. AltaGas does not intend, and does not assume any obligation, to update these forward-looking statements. The forward-looking statements contained in this news release are expressly qualified by this cautionary statement.
